PROFESSIONAL SUMMARY

Computer Science (Data Science) Engineering graduate with hands-on experience in Python, SQL, Data Analysis, Machine Learning, Data Visualization, and AI fundamentals. Skilled in data cleaning, exploratory data analysis (EDA), statistical analysis, Power BI, Pandas, NumPy, and Git. Practical experience through internships in Python Full Stack Development and Data Science. Passionate about solving real-world problems and seeking opportunities as a Data Analyst, Data Engineer, Software Engineer, Software Developer or AI/ML related roles.

SKILLS

Programming & Query Languages: Python, SQL, JavaScript (Basics), HTML, CSS

Data Analysis: Pandas, NumPy, Microsoft Excel, Data Cleaning, Preprocessing.

Data Visualization: Power BI, Tableau, Matplotlib.

Tools: GitHub, Visual Studio Code, Jupyter Notebook

AI & LLMs: Agentic-AI, Prompt Engineering, LangChain, RAG.

Core Concepts: Machine Learning, Supervised Learning, Classification

Soft skills: Analytical Thinking, Problem-Solving, Adaptability, Communication.

PROJECTS

Real-Time Attendance Management System

Technologies: Python, OpenCV, Face Recognition, SMTP, NumPy

- Developed a real-time facial recognition attendance management system using Python and computer vision.
- Collected and processed 20+ facial images per student across multiple angles for model training.
- Built a face encoding pipeline for accurate recognition under different lighting conditions.
- Automated attendance tracking and reduced manual intervention.
- Integrated SMTP email notifications to automatically alert parents regarding student absenteeism.

Remote Job Market Intelligence System

Technologies: Python, SQL, Pandas, Power BI, Excel

- Cleaned and preprocessed a dataset containing 500+ job records by handling missing values and outliers.
- Performed Exploratory Data Analysis (EDA) to identify hiring trends, salary distributions, and in-demand skills.
- Built interactive Power BI dashboards for business reporting and visualization.
- Generated insights to identify emerging technologies and skill gaps in the remote job market.

WORK EXPERIENCE

Python Full Stack Intern - Dhee Coding Lab

- Completed a 6-month internship in Python Full Stack Development.
- Developed responsive web pages using HTML and CSS.
- Built backend functionalities using Python.
- Performed SQL queries for database operations and data retrieval.
- Worked on CRUD operations and database integration.

Data Science Intern - Evoastra Ventures

- Performed data cleaning, preprocessing, transformation, and formatting on structured datasets.
- Handled missing values, duplicate records, and outlier detection to improve data quality.
- Conducted Exploratory Data Analysis (EDA) using Python, Pandas, and NumPy.
- Applied statistical methods to identify trends, patterns, and actionable insights.
- Assisted in preparing datasets for Machine Learning models.

TRAINING & CERTIFICATIONS

Data Science Training - Adverk Technologies

Python programming, data analysis workflows, regression, and classification.

Artificial Intelligence Course - Elewayte

Supervised learning, neural networks, model evaluation, and AI applications.

AI & Machine Learning Course - Win in Life Academy

Machine learning algorithms, model building, and professional communication.

EDUCATION

B.E. in Computer Science (Data Science)

CGPA: 8.6 / 10 (2026)

Class XII (State Board)

89.52 / 100%

Class X (State Board)

90/100%
